IN RE:)
) Civil Action No. 05-MD-1717-JJF
INTEL CORPORATION)

**OBJECTIONS OF THIRD PARTY RESEARCH INTERNATIONAL TO INTEL
CORPORATION'S AND INTEL KABUSHIKI KAISHA'S SUBPOENA ISSUED TO
RESEARCH INTERNATIONAL**

Pursuant to the Federal Rules of Civil Procedure, including Rules 26 and 45, and the Local Rules of the United States District Court for the District of Delaware, third party Research International hereby objects to the subpoena served upon Research International by defendants Intel Corporation and Intel Kabushiki Kaisha (collectively, "Intel").

GENERAL OBJECTIONS

Research International asserts the following General Objections in response to each and every Request in the subpoena, whether or not they are separately stated in each response:

1. Research International objects to each and every Request, and to the subpoena in its entirety, to the extent that these Requests seek information protected by the attorney-

client privilege and work product privileges, and other applicable privileges and protections. Research International will not provide any such privileged or protected information.

2. Research International objects to each and all of Intel's purported "Instructions" to the extent they purport to impose obligations that are unauthorized by, additional to, or inconsistent with Rules 26 or 45 of the Federal Rules of Civil Procedure or the Local Rules of the United States District Court for the District of Delaware. Research International will not comply with any such unauthorized, additional, or inconsistent instructions.

3. Research International objects to each and every Request to the extent it calls for information that contains or reveals trade secrets or other confidential research, development, commercial, financial, or personnel information, which, if disclosed or disseminated without restriction to Intel or third parties, could adversely impact AMD's or Research International's business. Research International will not produce any such confidential information except pursuant to the protective order in place in this action.

4. Research International objects to each and every Request to the extent it calls for information held subject to contractual or other legal obligations of confidentiality owed to its employees, clients, customers, or other third parties. Research International will not produce any such third party confidential information except pursuant to the protective order.

5. Research International objects to the Requests as unduly burdensome, oppressive, unreasonable, overly broad, and exceeding the scope of allowable discovery from a third party.

6. Research International objects to the Requests as unduly burdensome, oppressive, unreasonable, overly broad, and exceeding the scope of allowable discovery from a third party to the extent it seeks documents that are in the possession, custody or control of parties to the litigation and the reliability of those documents is not in dispute.

7. Research International further objects to each and every request to the extent that it is not limited to documents reasonably in Research International's possession custody or control. If Research International is required to produce documents pursuant to Intel's subpoena, it will undertake to produce only those documents within its possession, custody or control, that it is able to locate after a reasonable search.

8. Research International objects to Intel's definition of the word "AMD" as vague, ambiguous, and overbroad. Using that definition renders these Requests unduly burdensome, and results in their seeking information that is not relevant to the claim or defense of any party or reasonably calculated to lead to the discovery of admissible evidence.

9. Research International objects to Intel's definition of the word "RI" as vague, ambiguous, and overbroad. Using that definition renders these Requests unduly burdensome, and results in their seeking information that is not relevant to the claim or defense of any party or reasonably calculated to lead to the discovery of admissible evidence.

10. Research International objects to Intel's definition of the word "customer" as vague, ambiguous, and overbroad. Using that definition renders these Requests unduly burdensome, and results in their seeking information that is not relevant to the claim or defense of any party or reasonably calculated to lead to the discovery of admissible evidence.

11. Research International objects to Intel's definition of the words "relate to," "relating to," "related to" and "concerning," as vague, ambiguous, and overbroad. Using that definition renders these Requests unduly burdensome, and results in their seeking information that is not relevant to the claim or defense of any party or reasonably calculated to lead to the discovery of admissible evidence.

12. Research International objects to Instruction 1 and to each and every request for production as unduly burdensome, oppressive, unreasonable and overly broad, and exceeding the scope of allowable discovery from a third party to the extent that the time period set forth in Instruction 1 seeks to require Research International to produce documents created from “April 1, 2000 through the present”. Based on the agreement between Research International and Intel, Research International will produce responsive, non-privileged documents created from April 1, 2000 to December 31, 2007. Intel has the right to seek discrete sets of responsive, post-December 31, 2007 documents, upon a showing of good cause.

13. Research International objects to Instruction 3 as unduly burdensome, vexatious and unreasonable to the extent Intel seeks to reserve the right to later come back to a third party to request paper copies of documents that have already been provided in electronic format.

14. Research International objects to Instruction 5 on the grounds that the information requested for a privilege log is unduly burdensome. Research International bases these responses on the assumption that Intel does not intend to seek documents or information protected against discovery by the attorney-client privilege, work product rule, or any other applicable privilege. Based on that assumption, Research International will not prepare a privilege log.

15. Research International objects to Instruction 6 on the grounds that the information requested for a list of redactions made from any document that is produced is unduly burdensome and unreasonable. Research International will not supply such a list.

16. Research International objects to Instruction 8 and to each and every request for production as unduly burdensome, oppressive, unreasonable and overly broad, and exceeding the scope of allowable discovery from a third party to the extent that Instruction 18 seeks to deem these “continuing requests” and to require Research International to supplement its responses to

this subpoena. Based on the agreement between Research International and Intel, Research International will produce responsive, non-privileged documents created from April 1, 2000 to December 31, 2007. Intel has the right to seek discrete sets of responsive, post-December 31, 2007 documents, upon a showing of good cause.

17. Research International objects to the Requests in that they seek information that is neither relevant to the claims or defenses of a party nor reasonably likely to lead to the discovery of admissible evidence, and information that, even if it were relevant, could be obtained from other sources.

18. Many of the documents requested may be responsive to multiple requests, and Research International objects to each and every request on the grounds that each such request is unduly burdensome, vexatious and oppressive.

19. Research International further objects to the time and place of production identified in the subpoena. Instead, responsive documents will be produced under mutually acceptable conditions at a mutually acceptable date, time and location.

20. Research International would be willing, and hereby offers, to continue to meet and confer with Intel about Intel's Requests and Research International's objections.

RESPONSES TO REQUESTS

REQUEST NO. 1:

All documents concerning or relating to any research, marketing, and/or advertising services performed by RI for AMD, including but not limited to services relating to the AMD brand, AMD's image in the marketplace, and/or AMD's performance in the marketplace relative to its competitors.

RESPONSE TO REQUEST NO. 1:

Research International incorporates its General Objections into this Response as if fully set forth herein. Research International further objects to this Request on the ground that it is compound, vague and ambiguous, overbroad, and unduly burdensome. Research International also objects to this Request on the ground that it calls for the production of documents and information that is neither relevant to the claims or defenses of a party, nor reasonably likely to lead to the discovery of admissible evidence. Research International further objects to this Request to the extent that it seeks information that is protected from disclosure by the attorney-client privilege, the work product doctrine and other applicable privileges and protections. Research International further objects to this Request to the extent that it seeks the production of documents containing proprietary or confidential business information, trade secrets, or other sensitive information concerning Research International.

Subject to and without waiving the foregoing, Research International will produce non-privileged documents, located after a reasonable search of its files of work done for AMD, that are responsive to this request, except that Research International will not produce documents related to its costs for work done for AMD unless those documents were provided to AMD.

REQUEST NO. 2:

All documents concerning or relating to services performed by RI for AMD, including but not limited to:

- a. interviews with customers, industry analysts, business partners, and/or AMD employees, including any recordings, transcripts or notes made of such interviews

relating to AMD, the AMD brand, AMD product performance or AMD marketing campaigns;

b. customer surveys, studies, analyses, or other customer information or data compilations;

c. reports or recommendations prepared by RI as a result of its research, marketing, and/or advertising efforts, including all drafts, notes or internal communications prepared by RI regarding such reports or recommendations.

RESPONSE TO REQUEST NO. 2:

Research International incorporates its General Objections into this Response as if fully set forth herein. Research International further objects to this Request on the ground that it is compound, vague and ambiguous, overbroad, and unduly burdensome. Research International also objects to this Request on the ground that it calls for the production of documents and information that is neither relevant to the claims or defenses of a party, nor reasonably likely to lead to the discovery of admissible evidence. Research International further objects to this Request to the extent that it seeks information that is protected from disclosure by the attorney-client privilege, the work product doctrine and other applicable privileges and protections. Research International further objects to this Request to the extent that it seeks the production of documents containing proprietary or confidential business information, trade secrets, or other sensitive information concerning Research International.

Subject to and without waiving the foregoing, Research International will produce non-privileged documents, located after a reasonable search of its files of work done for AMD, that are responsive to this request, except that Research International will not produce documents related to its costs for work done for AMD unless those documents were provided to AMD.

REQUEST NO. 3:

All documents concerning or relating to any communications with or about AMD, including but not limited to those communications relating to the AMD brand, AMD's image in the marketplace, and/or AMD's performance in the marketplace relative to its competitors.

RESPONSE TO REQUEST NO. 3:

Research International incorporates its General Objections into this Response as if fully set forth herein. Research International further objects to this Request on the ground that it is compound, vague and ambiguous, overbroad, and unduly burdensome. Research International also objects to this Request on the ground that it calls for the production of documents and information that is neither relevant to the claims or defenses of a party, nor reasonably likely to lead to the discovery of admissible evidence. Research International further objects to this Request to the extent that it seeks information that is protected from disclosure by the attorney-client privilege, the work product doctrine and other applicable privileges and protections. Research International further objects to this Request to the extent that it seeks the production of documents containing proprietary or confidential business information, trade secrets, or other sensitive information concerning Research International.

Subject to and without waiving the foregoing, Research International will produce non-privileged documents, located after a reasonable search of its files of work done for AMD, that are responsive to this request, except that Research International will not produce documents related to its costs for work done for AMD unless those documents were provided to AMD.
